

The wide array of designs presented in this volume offers a wide and varied vision of the latest trends in Bars & Restaurants.

This diverse collection is an excellent cross-section of some of the most cutting-edge wining-and-dining hotspots in the world. With the impulses of creativity given free reign, these designs have inevitably been excellent testing grounds for studying different trends in architectural language, use of materials and volume design. Each project in this choice selection is lavishly illustrated with full-colour photos, floor plans and sketches and first-hand, expert commentary from the designing studios themselves.
